

September 30, 2012

Dear Valued Customer:

We are pleased to announce a new standard of safety for all of Home Acres Building Supply drywall deliveries. Effective October 1st, delivery of drywall stocked on edge, will be secured with a drywall stabilizing clip - the **RockSteady® Clip**. This device secures drywall in a leaning position to prevent potential harm from accidental or incidental tip-over of the drywall.

Standing drywall up on a job site can provide many benefits and now there is a method to do so more safely.

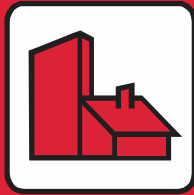

The purpose of the RockSteady® Clip is to secure, warn and protect.

It is our hope and trust that you and others on the job site are more secure with the clip in place.

Thank you for the opportunity to serve you with our products and services!

The Team at Home Acres

RockSteady® Clips are made of metal and are reusable. Please support this safety initiative by returning clips to us whenever practical. THANK YOU!!!
